Application No. 09/804,021

ORDER RETURNING UNDOCKETED APPEAL TO EXAMINER

This application was received electronically at the Board of Patent Appeals and Interferences on January 30, 2007. A review of the application has revealed that the application is not ready for docketing as an appeal. Accordingly, the application is herewith being returned to the examiner. The matters requiring attention prior to docketing are identified below:

On September 28, 2005, appellants filed an Appeal Brief under 37 CFR § 41.37. A review of the file reveals that the "Summary of Claimed Subject Matter," as required by 41.37(c)(1)(v), is not properly set forth. 37 CFR § 41.37(c)(1)(v) which states:

(v) ***Summary of claimed subject matter.*** A concise explanation of the subject matter defined in each of the independent claims involved in the appeal, which shall refer to the specification by page and line number, and to the drawing, if any, by reference characters. For each independent claim involved in the appeal and for each dependent claim argued separately under the provisions of paragraph (c)(1)(vii) of this section, every means plus function and step plus function as permitted by 35 U.S.C. 112, sixth paragraph, must be identified and the structure, material, or acts described in the specification as corresponding to each claimed function must be set forth with reference to the specification by page and line number, and to the drawing, if any, by reference characters.

The independent claims must be mapped to the disclosure, including specification page and line number, and, if applicable, drawing reference characters.

Correction is required. MPEP § 1205.03 states:

When the Office holds the brief to be defective solely due to appellant's failure to provide a summary of the claimed subject matter as required by 37 CFR 41.37(c)(1)(v), an entire new brief need not, and should not, be filed. Rather, a paper providing a summary of the claimed subject matter as required by 37 CFR 41.37(c)(1)(v) will suffice. Failure to timely respond to the Office's requirement will result in dismissal of the appeal. See MPEP § 1215.04 and §711.02(b).

In addition, on January 23, 2006, an Examiner's Answer was entered into the record. In the Evidence Relied Upon section, page 3, paragraph 8, the examiner relied on the following references:

A review of the file reveals that references Kimura et al. (U.S. Patent No. 6,518,962) and Youngquist et al. (U.S. Patent No. 6,518,962) were used in the rejection of claims 1, 4-10, 13-16, and 18-20, as stated in the Grounds of Rejection, paragraph (9) of the examiner's answer. The Manual of Patent Examining Procedure, in

§ 1207.02 states:

(8) *Evidence Relied Upon.* A listing of the evidence relied on (e.g., patents, publications, admitted prior art), and, in the case of nonpatent references, the relevant page or pages.

Before further review, the examiner must mail a PTOL-90 that will include in the amended Evidence Relied Upon section, the list of references mentioned in the Grounds of Rejections. See the Manual of Patent Examining Procedure, (MPEP) § 1207.02. Appropriate correction is required.

Accordingly, it is

ORDERED that the application is returned to the Examiner:

- 1) to hold the Appeal Brief of September 28, 2005 defective;
- 2) notify appellants to file a paper providing a summary of the claimed subject matter as required by 37 CFR 41.37(c)(1)(v);

3) consider the paper providing a summary of the claimed subject matter as required by 37 CFR 41.37(c)(1)(v);

4) issue and mail a PTOL-90 having the missing references listed under the Evidence Relied Upon section, heading (8) of the Examiner's Answer; and

5) for such further action as may be appropriate.
